DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi et al. (JP 56109205).

Takeuchi et al. disclose a method for producing a rubber composition containing a 2-40% content of 1,2-polybutadiene, cis-1,4-polyisoprene, toluene, water, cobalt compound (cobalt octanoate), trialkyl aluminum (triethyl aluminum), and carbon disulfide (claim 1, Example 1). This rubber can further be blended with natural rubber or isoprene rubber for tire applications (Table 3 Working Example 3, second paragraph on page 10 in translation, first paragraph on page 3 in translation).

The limitations of claims 2-6 can be found in Takeuchi et al. at Example 1 and pages 4 through 9 in translation, where it discloses the process and polybutadiene containing 98% of a cis-1,4-bond and having a Mooney viscosity of 65.

The limitations of claims 7 and 23 can be found in Takeuchi et al. at first paragraph on page 9 in translation, where it discloses the polymerization temperature in -20 to 80°C.

Claims 8-9 and 24-25 are inherent properties.

The limitations of claims 10-12 can be found in Takeuchi et al. at Claim, where it discloses the cobalt.

The limitations of claims 13 and 14 can be found in Takeuchi et al. at Example 1 and second and third paragraphs on page 5 in translation, where it discloses the process and hydrocarbon-based solvent.

The limitations of claim 15 can be found in Takeuchi et al. at Example 3, where it discloses 50 parts by weight of carbon black.

The limitations of claims 16-22 can be found in Takeuchi et al. at abstract and first paragraph on page 3 in translation, where it discloses the tire applications, improved property to tire cord and high hardness.

The limitations of claims 26 and 27 can be found in Takeuchi et al. at Claim 1, where it discloses the polyisoprene.

The limitations of claim 28 can be found in Takeuchi et al. at Example 1, where it discloses carbon black.
